+60 3 2333-2088

Extremely deep value stock; 53% upside

We initiate coverage on Goldis with a Buy rating and RM3.05 price target. We like Goldis for its undemanding valuations and it provides a much cheaper exposure into IGB (BUY; RM3.00 price target). Goldis is the single largest shareholder of IGB with a 27.03% stake in the latter. Our target price is based on a 25% discount to Goldis' RNAV. We believe this is fair judging from IGB's trading history in 2006.

Value of assets is worth much more

Goldis' most valuable assets are its stake in IGB (which account for two-thirds of Goldis' value) and a commercial project on a 1.95-acre piece of land known as Goldis Tower. If these assets were revalued to their fair value, Goldis would trade at a 51% discount to its RM4.09 RNAV / share. Its RNAV comprises RM3.03 BV/share, and respective revaluation surplus from IGB (RM0.60/Goldis share) and Goldis Tower (RM0.46/Goldis share).

It does not get any cheaper than this

Although close to 100% of core earnings are derived from 27.03%-owned IGB, there is a huge disparity between the PE multiples of these two companies. IGB trades at 25x CY07E EPS while Goldis trades at only 10x CY07E EPS. Goldis' stake in IGB alone is worth RM3.09/Goldis share, that is to say, Goldis' market cap is only 65% of the market value of its stake in IGB.

Catalyst lies in IGB's sustained re-rating

We believe the re-rating catalyst for Goldis lies in IGB's share price movements. If IGB's share price continues on its uptrend, the market is likely to take notice of Goldis' growing discount to its RNAV and ultimately there should be a positive adjustment to Goldis' stock price. Risks to our Buy rating are (1) sustained drop in IGB's share price; and (2) Goldis continually pumps money into its private equity investments that have little commercial viability.

Company Description

Goldis is a private equity investment company with investments in property, production and sale of dermatological products, the provision of mobile messaging services, paper manufacturing, aquaculture and water/wastewater treatment.

Stock Data

Price to Book Value 0.6x

Chart 1: Share price movement of Goldis and IGB

Source: Merrill Lynch, Bloomberg

A property gem

The two most valuable landed assets in Goldis are its 27% stake in IGB Corporation (IGB) and its commercial property project in Kuala Lumpur under wholly-owned Goldis Tower.

Its stake in IGB accounts for the biggest chunk of Goldis' balance sheet, making up two-thirds of total BV of assets as at Jan 07. The land for Goldis Tower accounts for only 3.4% of total BV of assets. Although these assets are carried at historical cost, Goldis still trades at 0.7x Jan 07 BV.

Revaluing these assets to fair value, Goldis will be trading at a steep 51% discount to its RM4.09 base case RNAV/share. Goldis' stake in IGB alone accounts for 75.4% of our estimated RNAV while the revaluation surplus from Goldis Tower accounts for 11.2%.

Table 1: Goldis: Revised net asset value (RNAV) estimate – Base case scenario

	Base case (RMmn)	RM / Goldis share

Source: Merrill Lynch, Company

Cheaper indirect exposure to IGB

The single largest asset on Goldis' balance sheet is its 27% stake in IGB Corporation (IGB). This accounts for two-thirds of the BV of total assets as at Jan 07.

Goldis' stake in IGB alone is worth RM3.09/Goldis share, as against Goldis current price of RM2.00/share. To put it in another context, Goldis' market cap is only 65% of the market value of its stake in IGB.

Revaluing Goldis' stake in IGB up to its market price, we derive a revaluation surplus of RM0.60/Goldis share.

Table 2: Goldis: Revaluation surplus from IGB

Goldis Tower: New CEO space at a prime location

Goldis is investing in a project on a 1.95-acre piece of land located at the intersection between Jalan Ampang and Jalan Tun Razak in the heart of Kuala Lumpur. The site is 15 minutes walk from Kuala Lumpur City Center.

Chart 2: Location map for Goldis Tower

Source: Merrill Lynch, Company

The project is a 30-storey office tower with an approved gross floor area of over 1mn sqf. Goldis carries the land at RM40.9mn and has budgeted over RM300mn to develop the site.

When the project is completed in 2009, Goldis plans to keep it for rental income. In the more distant future, we would not be surprised if Goldis decides to inject the tower into a REIT.

We estimate Goldis Tower to be worth RM510mn when completed. This implies a revaluation surplus of RM169.1mn. Discounting this back to present value at a 7% discount rate, we derive a revaluation surplus of RM0.46/Goldis share.

We have assumed an average rental rate of RM5 psf / month, 70% NPI margin, 100% occupancy and 7% net rental yield. The estimated RM510mn market value for Goldis Tower implies a value of RM600psf.

The most recent sale of office towers near Goldis Tower was in 2H06 when Macquarie Global Property Advisors bought Empire Tower for RM466psf of NLA. In other parts of Kuala Lumpur such as on Jalan Sultan Ismail, Kenanga International Building was sold at RM554psf.

Given the tight market conditions for prime office space in Kuala Lumpur, we believe that market values of office space can easily reach RM600psf by 2009.

Table 3: Goldis: Revaluation surplus from Goldis Tower

Potential risks

We identify the following potential risks in the business:

Private equity investments may require significant funding

Most of Goldis' private equity investments have yet to gain critical mass and many of them are still in the nascent stages of growth. This means they could require significant funding from Goldis before they are able to rely on their own cashflows. When Goldis provides the funding for these private equity investments, it may take a long time before these funds can be recouped.

We think this is a small risk as Goldis funds its investments in a drip feed manner. In other words, it injects small amounts of capital over time rather than injecting a significant lump sum of cash into its investments. This allows Goldis to limit its exposure and monitor its investments.

■ Worst-case basis: Goldis would still trade at 33% discount to RNAV

Even on a worst-case basis, if we hypothetically write-off all of Goldis' assets save for its associate stake in IGB and its interest in Goldis Tower, we derive a worst case RNAV of RM3.00/Goldis share. Goldis trades at a 33% discount to this worst case RNAV.

Table 4: Goldis: Revised net asset value (RNAV) estimate - Worst case scenario

	Worst case	Per Goldis sh
Goldis BV as at Jan 07	972.6	3.03

Discount to NAV		33.2%

* (Total assets as at Jan 07 RM1,190.2mn) - (Investment in Associates RM796.832mn + Holding cost of Goldis Tower land RM40.9mn)

Source: Merrill Lynch, Company

Funding mismatch on balance sheet

On a consolidated basis, a small part of Goldis' non-current assets are funded with current liabilities. Although this may present some short term liquidity problems in the event of a credit run, we think this can be easily resolved by Goldis terming out its short term debt. After all, it only has a net gearing of 10.7%.

Recommendation and valuations

We initiate coverage on Goldis with a Buy rating and an RNAV-based RM3.05 price target. Our target price is based on a 25% discount to Goldis' RM4.09 base case RNAV / share. Judging from the trading history of IGB, we believe a 25% discount is justified.

Recall IGB was also trading at a steep 53.3% discount to its historical RM2.46 RNAV/share at the beginning of 2006. This discount narrowed considerably as research coverage of the stock improved throughout the year. Fundamentally, IGB's earnings profile was gaining more clarity resulting in a re-rating in its share price. By the end of 2006, the discount between IGB's stock price and its RNAV / share had narrowed from 53% to 27%.

Our RM3.05 price target implies 1x Jan 08E BV and 15x FY Jan 08E EPS.

Exposure to our favorite commercial property play - IGB

In our view, Goldis stands out as one of the cheapest and most under-priced stocks. The stock also gives investors exposure to our favorite commercial property stock via its 27% associate stake in IGB. We have a Buy rating on IGB with a RM3.00 RNAV-based price target.

Just plain cheap

Goldis trades at 0.7x Jan 07 BV and 10x FY Jan 08E EPS. More importantly, the stock trades at an unjustified 51% discount to its base case RNAV/share.

Although almost all of Goldis' core earnings are derived from 27%-owned IGB, there is a huge disparity between the PE multiples of these two companies. IGB trades at 25x CY07E EPS while Goldis trades at 10x CY07E EPS.

Catalyst lies in IGB's re-rating

We believe the re-rating catalyst for Goldis lies in IGB's share price movements. If Goldis' share price stays where it is, the discount to its RNAV would only widen as IGB's share price increases. On a best-case basis, if IGB touches our RM3.00 RNAV-based price target, Goldis' discount to its RNAV would widen from 51% to 58%.

Table 5: Goldis: Revised net asset value (RNAV) estimate - Best case scenario

	Best case	Per Goldis sh
Goldis BV as at Jan 07	972.6	3.03
Revaluation surplus from IGB	406.3	1.27
PV of revaluation surplus from Goldis Tower	147.7	0.46
RNAV	1,526.5	4.76
Existing share price RM)		2.00
Discount to NAV		-57.9%

Source: Merrill Lynch, Company

In the long term, if IGB's share price continues on its uptrend, the market is likely to take notice of Goldis' growing discount to its RNAV and ultimately there should be a positive adjustment to Goldis' stock price.

The chart below indicates that there has been a strong correlation between the movement of IGB's share price and Goldis' share price in the past. However, in recent months, IGB's share price has appreciated much faster than Goldis'.

Chart 3: Share price movement of Goldis and IGB

Source: Merrill Lynch, Bloomberg

Financials

The biggest earnings contributor is from 27%-owned associate IGB. Earnings from this division made up >100% of 2006 pre-tax earnings. Although most of the other divisions are profitable at the operating profit level, these divisions will only gain critical mass and start contributing to the bottom-line in a significant manner over the long term.

We expect associate contributions from IGB to be the main driver of earnings growth.

Private equity investments in Malaysia

Company	Goldis stake (%)	Principal activity
HOE Pharma	78.15%	Dermatological and healthcare company
Macro Kiosk	70%	Mobile data communication technology provider
Macro Lynx	100%	Broadband solutions and service provider
Ecosem	100%	Semiconductor assembly, packaging and testing company. This has ceased operations

Private equity investment in China

Company	Goldis stake (%)	Principal activity
Tianjin Manex Natural Fibre Thin Film	72%	Paper manufacturing
Gold Water - Shanghai	90%	Engineering services for pure water treatment plant
Gold Water - Singapore	90%	Provision of pure water and water treatment plants

Source: Merrill Lynch, Company

All of Goldis' investments (except for property investments) are in their nascent stages and have yet to gain critical mass. *Currently, close to 100% of earnings are derived from property investment. A quick glance at the balance sheet hints that >71% of its assets are property investments.*

In the short term, management expects the property division to be the main driver of growth. Over the long term, management believes its investments in other industries will start to contribute in a more significant manner.

Management

Ms. Tan Lei Ching (50 years old) is the CEO of Goldis. She is the prime mover in identifying and developing projects that are in the growth industries. She has 27 years of experience in the property industry and the corporate sector. She is the daughter of Dato' Tan Chin Nam, who is a major shareholder of the company.

The founders and entrepreneurs of the private equity projects Goldis has invested in are still owners and are actively involved in the day-to-day operations of their respective businesses.

Price Objective Basis & Risk

Goldis

Our Buy recommendation and RM3.05 price target on Goldis is based on a 25% discount to our revised RNAV/share of RM4.09. We believe a 25% discount is justified judging from the trading history of IGB.

Our RNAV estimate values Goldis' 27% stake in IGB at IGB's current share price of RM2.47/IGB share. It also values Goldis Tower at RM510mn.

Risks to our recommendation : (1) a sustained negative movement in IGB's share price; and (2) the possibility of Goldis pumping money into its private equity investments that have little commercial viability.

IGB Corporation (IGBCF, C-1-7, RM2.44)

Our RM3.00/share price target for IGB is based on the stock's RNAV/share. We believe the stock will be re-rated as (1) market awareness on the underlying value of its assets grows following the relisting of 74.9%-owned KrisAssets Holdings; and (2) its earnings momentum accelerates towards 3Q07.

Risks: Our Buy recommendation and price target hinges on the success of IGB's developments, especially its development in Mid Valley City.
